

Experience

Frontend Developer at 3CP Digital Agency

January 2021 - September 2021

- Maintained mostly commercial sites using **JavaScript**, **Bootstrap**, **jQuery**, improved their aesthetics with **CSS**, and enhanced their functionality. I had the opportunity to work directly with non-tech people.

React Developer at Eurobank Ergasias (for Agile Actors)

April 2022 - Present

- Built and maintained almost every View from the apps below with **React**, and UI libraries like **Antd** and **Material UI**.
 - Mifid Questionnaire: I created every View of the questionnaire. Almost non existent bugs in production
 - Jira Workflow App: I created every view of the frontend and deployed it.
 - Suitability Questionnaire: Led a team of two developers to create a questionnaire that tests the experience and knowledge in Investing
- Trained 5 developers to create production code by showing them concepts at the projects I was developing.
- Took designing decisions and helped in managerial issues regarding the function and purpose of the team.
- Always delivered on time.
- Created a plethora of reusable components that were used by other teams.
- Proud for helping in the expansion of other projects I haven't developed and helping other developers make important deliveries in their own projects.

Personal Projects

Dog App

React, TypeScript, CSS-In-Js

- Shows images from the Dog API and the user can view and search various breeds.
- The user can find breeds easily with a search bar, see random dog images and fetch even more images asynchronously, and find breeds and subBreeds efficiently. - [code](#)

arisbarlos.com

React class components, CSS

- I redesigned and aspired to make a unique website.
- Changed the file structure to make it more maintainable and simplified the previous codebase.
- Took many lessons in making my code easier to update. [code](#)

Education

Computer Engineering and Informatics Department at University of Patras

September 2013 - September, 2020

- Completed **by myself**, on time, and with full functionality, a wide variety of **projects** (some of them team projects) in Java, C++, Web Development, Scientific Computing, Networks, and other related fields.
- Received an **Integrated Master's** from the Computer Engineering and Informatics Department for attending the 5-year Computer Science curriculum.

Skills
